Claimed to Supersede Brooms, Carpet

Cleaners and Other Appliances. A curious demonstration of the march of science with regard to the sanitary and hygienic cleaning of floor coverings and upholstered furniture was made this morning in the offices of the auditor at the United States Post Office Department. A small red wagon, on which was mounted a gasoline engine, air tanks and an air compressor, was pulled up to the 12th street side of the building, a hose was quickly attached and sent up five stories, through an open window into a suite of offices, and the engine was started. A nickel-plated tool, in action resembling a carpet sweeper without wheels, was then fixed to the upper end of the hose line. This machine was pushed over the floors and the upholstering, and by a blast of compressed air assisted by a suction device, all this being supplied by the machine on the pavement, the dust and filth was sucked out of the carpet and other fabrics, even to the dust which had sifted through to

It is understood a local company, com-posed of a number of Washington's most prominent business men, has purchased these machines for use in the District. It was stated by the superintendent that the ompany offers a very attractive permanent machine for installation in residences, places of business, office buildings and the like. STREET IMPROVEMENTS. Schedule Prepared and Submitted to

District Commissioners. The executive committee of the Bloomingdale, Le Droit Park and Reservoir Heights Citizens' Association was authorized and directed at the last regular meeting before the summer recess to consider and report to the District Commissioners as soon as possible a list of street improvements for which it is desired by the association to ask Congress to make appropriation at the next session. That committee, consisting of the officers and chairmen of all committees, has accordingly asked the Commissioners to incorporate in their recommendations to Congress for 1906 the following streets: Asphalt 3d street from Florida avenue to Elm street.

Asphalt or block V street from 1st street to Flagler street.

Complete the block pavement on U street between 1st and Flagler streets. Open W street from 1st street to North Capitol street.

Open Albany street from 1st street to North Capitol street. Open, grade and asphalt V street from Flagler street to 2d street. Open 2d street from U street to Trumbull street.

Bell Buoy Out of Order.

The officers of the river steamers coming into port from points on the river below Colonial Beach report the bell buoy at the upper end of the Kettle Bottom shoals out of order. It does not seem to be broken, it is stated, but there is an absence of the clear ring usually heard from the bell whenever there is the slightest rip-ple on the water. The matter will be brought to the attention of the lighthouse authorities at Baltimore, who have the Potomac river in charge.
